A1: In a few sentences, please provide feedback on your learning experience in this course. Consider the assignments and feedback you received, materials, learning activities and interactions with peers, your interactions with the instructor and other aspects related to your learning experience that you want to mention.

Despite I am not good at Maths and Calculus, this is a great course!
I believe if there were six homework assignments, each worth slightly less but the same amount in total, the grades would be more balanced. Overall, the rest of the structure of the class and exams is fair and conducive to a positive outcome.
I enjoyed this class. There's professor is very knowledgeable and the material is interesting.
Dr. Li is an amazing professor. Super personable and completely reasonable in workload, lecture lengths, and heaviness of topics covered. The homework group did not help me much however, the homework it self was extremely helpful in terms of test structure and difficulty.

		Strongly Disagree 1	Disagree 2	Neutral 3	Agree 4	Strongly Agree 5	N	Mode	Median	
A2	The overall structure of the course (content and materials, assignments, activities) promoted a meaningful learning experience for me.	- / -	- / -	1 / 20%	2 / 40%	2 / 40%	5	*	4	▁▁▁▆█ 1 2 3 4 5
A3	The instructor created a welcoming and inclusive environment.	- / -	- / -	- / -	1 / 20%	4 / 80%	5	5	5	▁▁▁▃█ 1 2 3 4 5

* Multimodal

A4: In the space provided, please provide an explanation for your rating in the previous question.

The professor is very approachable and I never feel like my question is stupid. He is knowledgeable about what he teaches and clearly enjoys the material which makes me want to learn more as well.
The professor was inviting and encouraging of all types of questions and discussion that benefitted the class.
While the class was not well paced or laid out the Professor did help fill the gaps.
He is very approachable and loves when students ask questions. He is always willing to hear his students out in times of need and willing to open office hours very last minute and take more time out of his day to help us as we take more time out of our day to learn his material. Very equal and just professor.
Always ready to answer questions and help everyone.

A5: If your course required materials, which materials or resources enhanced your learning? How?

The lecture PPT and notes are both really detailed for me to review.
NA
The exam prep is suppperrr helpful. It clamed my nerves down completely for the midterm since I knew the structure and the expectations.
None

A6: What are the most important things you learned in this course?

I really enjoyed talking and learning more about the insurance programs. Although I am born and raised in the US and have been around the same policies for my whole life, I did not know as much as I do now. It is imperative that people learn these topics and he did a very nice job of organizing the topic and teaching it in segments.
None
Externalities and Taxation.
There's a lot of important things we learned, but one that stuck out to me was the tax information. Since it applies to not just theory but

individuals like myself.
I believe that the problem-solving aspects of this course were much more important than the material itself.

A7: Do you have any recommendations for this course?

If reply on email timely, it will be better, all in all, nice professor!!!
None
Include more homework, but less heavily graded on each.
Drop the homework groups. It is better anyway for people to be required to do it on their own instead of increasing the chance of the free rider problem ;). It will also allow for students to figure out what is really confusing them and generate questions tailored to their understanding and their learning system.
